To Whom It May Concern,

### **Letter of Assessment**

From 01-Jul-2025 to 18-Aug-2025, pursuant to our agreement with Atlassian Pty Ltd (Atlassian), elttam conducted a review of the Fisheye and Crucible web applications version 4.9.1.

The engagement with Atlassian began with a briefing and walk-through. Subsequently, a single dedicated and experienced security consultant conducted the security assessment over the specified period. The security consultant had access to internal documentation, development guides, relevant repositories and got support from engineers. The assessment methodology used a code-assisted (white-box) approach and both automated and manual penetration testing techniques were used.

A final report, detailing technical issues and offering remediation advice, was then provided to Atlassian Pty Ltd.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government, and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our clients secure their most important assets.

Sincerely,

Marcela Benetrix  
Managing Consultant
